- Data Analysis

---

## PROJECTS

### Mobile App for Complaint and Evidence Management System

2023

The "Mobile App for Complaint and Evidence Management System" is a mobile application designed to streamline the reporting and management of complaints and associated evidence.

React | React Native | Node.js

### Online Shopping - E-Commerce Website

2023

Developed a e-commerce website for a clothing store, implementing user-friendly navigation, and responsive design. Utilized ReactJS to create an intuitive shopping experience, resulting in increased online sales and customer satisfaction.

React

### Time Series Analysis using MiniTab Software

2023

In our collaborative effort, the focus of our group project was the in-depth analysis of monthly car sales data in Brazil, utilizing Time Series Analysis techniques. The central goal of our report was to analyze and interpret patterns and trends inherent in the dataset.

### Data Analysis using R Software

2023

As a group project, we utilized the statistical programming language R to analyse a dataset. The report focuses on the data analysis process and findings obtained through the use of R
